
PROTOTYPE REFWAY APP

Prepared for: #HackTheCamp

Prepared by: Maria Dimitrakarakou

Date: 04/12/2016

With many refugees in Greece, a job search mobile application is only
a small way to help refugees to find a proper job.

Many of them are very skilled people, who just want to make a new start in a welcomed place.

Nobody can feel free without his/her independence and security.

Undoubtedly a job offers the opportunity to start over your life again.

Many refugees have limited technology materials apart from their smart phones, as most of their valuable left behind.

So that why I strongly believe that a smart phone application is totally addresses to theirs needs.

Refugees stay connected to their job search while on the go.

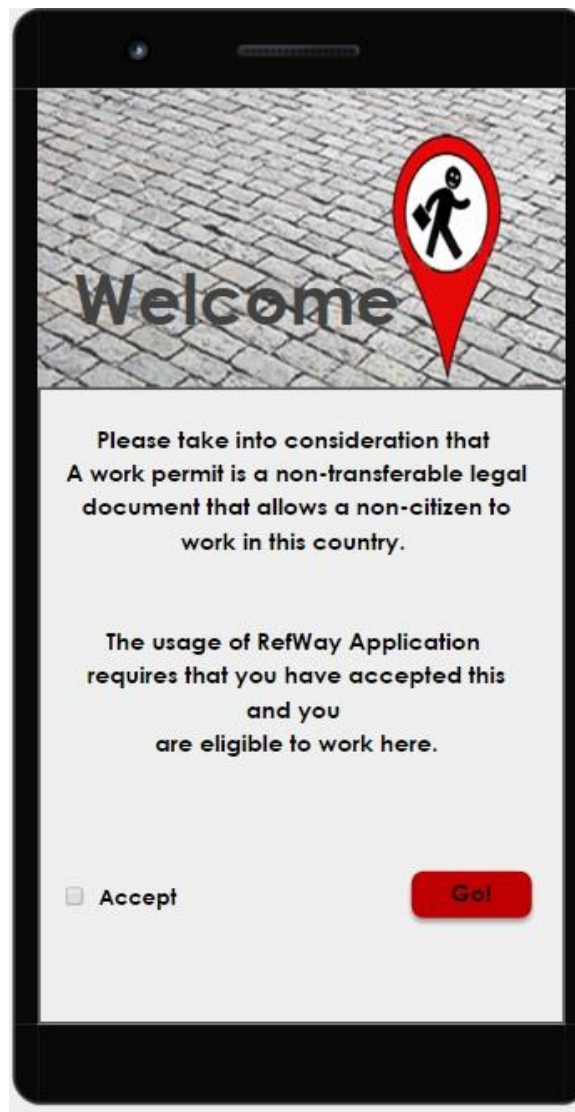

Search, view and apply to jobs - whenever and wherever they are as far the got this application and their smartphone.
